## Turnitin Requirement

Similarity must be maximum 15%. Single-source similarity must be maximum 3%. References are excluded from similarity checking if the institution setting supports exclusion.

## Revision Strategy

Paraphrase every literature paragraph, avoid copying abstracts, cite IEEE style, use original analysis for gap and novelty, and check similarity before final upload.

## Manual Step

The real Turnitin\_Report.pdf must be generated from the paid Turnitin system by the student or institution. This file is a readiness guide, not a substitute for the official Turnitin report.
