

Indeks Artikel Utama dan Panduan Sitasi IEEE

Achmad Maulana - 241730016

Dokumen ini merapikan artikel utama yang digunakan sebagai dasar literature review, research gap, novelty, dan research method NetGuard AI.

Tabel 1. Indeks artikel utama

No	Tahun	Judul	Dataset	Metode	Kekurangan
1	2021	Troubleshooting an Intrusion Detection Dataset: The CICIDS2017 Case Study	CICIDS2017	Dataset troubleshooting and validation	Focuses on dataset analysis, not an educational dashboard.
2	2024	Machine Learning for Cloud and Network Intrusion Detection	Network intrusion datasets	Machine learning comparison	Operational dashboard integration is limited.
3	2024	On Faulty Use of the CICIDS2017 Dataset in Network Intrusion Detection Research	CICIDS2017	Critical dataset review	Does not propose a beginner-ready monitoring prototype.
4	2024	Network Intrusion Detection Using Machine Learning and Feature Engineering	CICIDS2017 / related intrusion datasets	Feature engineering and classifier evaluation	Deployment and reproducible student artefacts are not central.
5	2024	Random Forest Permutation Feature Importance for Intrusion Detection	CICIDS2017 / cybersecurity dataset	Random Forest and permutation importance	Does not translate interpretation into dashboard actions.
6	2024	Adversarial Robustness of Network Intrusion Detection Systems	Network intrusion datasets	Adversarial robustness evaluation	Not focused on low-budget educational deployment.
7	2025	Intrusion Detection Using Machine Learning for Modern Networks	Public IDS datasets	Machine learning / deep learning comparison	Dashboard and novice administrator guidance remain limited.
8	2025	Information Security Intrusion Detection Using Machine Learning	IDS benchmark datasets	Machine learning comparison	Does not emphasize reproducible local-laptop implementation.
9	2025	Smart Deep Learning for IoT Intrusion Detection	IoT / IDS datasets	Deep learning-based IDS	Requires stronger compute and is less beginner-friendly.
10	2025	High Accuracy CICIDS2017 Intrusion Detection Using Random Forest	CICIDS2017	Random Forest	May be limited to accuracy reporting without dashboard context.
11	2025	Ensemble Learning for CICIDS2017 and CICIDS2018 Intrusion Detection	CICIDS2017 and CICIDS2018	Ensemble learning	More complex than the current low-budget teaching target.

Panduan Mendeley dan IEEE Style

Import semua PDF ke Mendeley Reference Manager.

Lengkapi metadata berdasarkan halaman artikel asli, DOI, dan situs penerbit.

Gunakan citation style IEEE agar sitasi menjadi numerik [1], [2], dan seterusnya.

Daftar pustaka pada draft artikel harus diverifikasi lagi sebelum Turnitin dan submit.
